

MARKING AND ENGRAVING OPTIONS

SILK SCREEN PRINTING

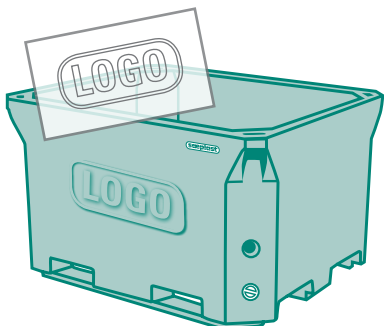

SÆPLAST offers silk screen printing for each tub at an additional cost. Silk screen printing is a unicolor deep print marking on the tub. We at SÆPLAST add the customer name or logo on each tub, making the container easily identifiable. Silk screen markings are available in single colour format and colours available are black, blue, red or white.

ENGRAVED MARKINGS

We at SÆPLAST also offer engraved markings onto SÆPLAST products at an extra cost to ensure individual container identification. Engraved markings are long-lasting and durable. Many customers choose to have serial numbers, company name, factory location or other information engraved onto their SÆPLAST tubs.

MOULD-IN GRAPHICS

We at SÆPLAST also offer multi-colour mould-in-graphic markings for SÆPLAST containers. Mould-in graphics is a visual way to identify customer property by using their company logo. The technology can also be used for marketing purposes or to strengthen branding.

Mould-in technology can also be used to present user guidelines or other messages that need to be presented for specific use of the product. This service is available upon request and at added cost.
