Put Your Trust in Sæplast to Care for Your Food

The **toughest** and **most food safe** reusable alternative to corrugated--wood base packaging, hard to maintain and repair stainless steel bins, and the fragile and easily damaged plastic single walls.

The Sæplast PE line offers many benefits for food safety peace of mind.

Benefits

- ✓ One piece rigid construction with a built in pallet base.
- ✓ Reusable and long lasting – multiple use.
- ✓ Smooth walls that are simple to clean and sanitize.
- ✓ Robust triple wall design with closed cell core **will not** absorb liquid, extending life and optimizing hygiene.
- ✓ Safe stacking saves floor space.
- ✓ Safe for employees – no assembly required.
- ✓ Safe for the environment – no land fill cost.

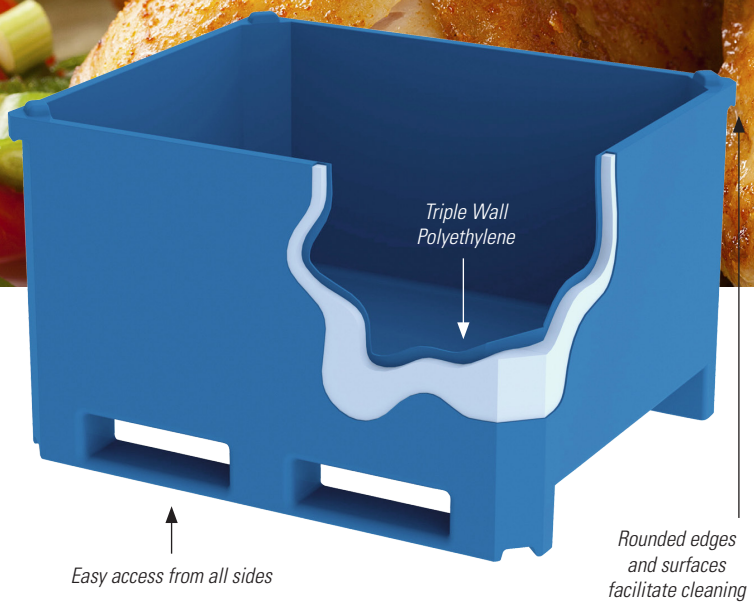
NOTE: All products made in leg or fork runner versions.
PE 630 made in Spain and Iceland Factories. PE 630, PE 750 and PE 875 all inner stack with one another and use the same lid.

Switch to Sæplast PE to Ensure Customer and Employee Health and Safety



Why mess with inferior material handling bins for your supply chain?

To maximize the value of your product you need to ensure that your food products are fresh and safe, Sæplast has designed the most rugged and hygienic plastic containers for your processing floor. Sæplast PE Containers are designed to meet the toughest demands of any environment.

What Will Sæplast PE Bins Replace?

Stainless Steel: Heavy, loud, costly, difficult to repair, unsafe for workers.

Plastic Single Wall: Fragile, easily broken, difficult to sanitize, unsafe for workers.

Corrugated Cardboard: 1–3 uses only, high assembly cost, easily damaged, unsafe for workers.

All of these products can, and will, harbor harmful bacterial growth and they are very unsafe for employees due to splintering, metal tearing, and boxes collapsing. As a result, these options are not the best food safety option for your protein handling needs.

DP40C-FR

Dimensions	External	
	inches	cm

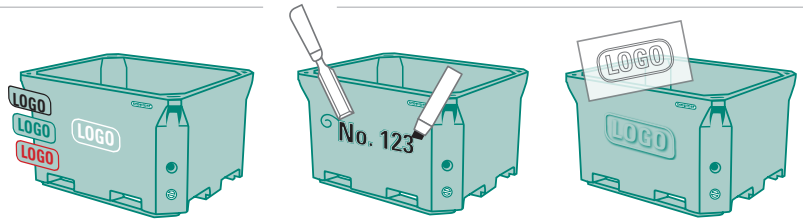
Sæplast Branding and Tracking Solutions

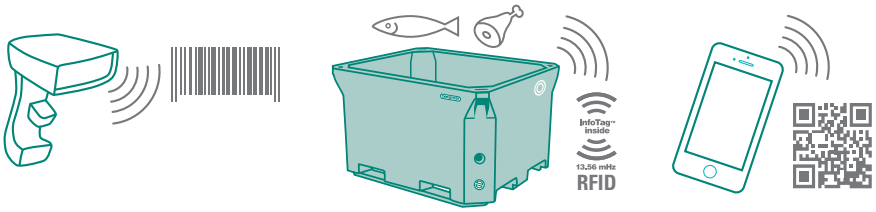
Branding:

Sæplast offers great ways to further enhance your brand by offering special marking options to your product such as silk screening, mold-in graphics and engraving. Please consult your Sæplast Sales Representative for further discussions as to what is available for your need.



Tracking:

Sæplast offers a wide range of tubs, pallets and other products, which can be equipped with bar codes, Radio Frequency Identification (RFID) tags or QR codes to assist in tracking your Sæplast product(s) and/or the contents within. We have partnered with specialized experts in the field of software and hardware in order to maximize your requirement.



Colorful and Easy to Stack

Sæplast containers are available in different colors for volume orders.

Regulatory Compliance

The material used (Polyethylene) fully complies with the regulations of the food industry.

Warranty

All Sæplast products brand models are guaranteed to be free of defects in material and workmanship upon delivery.

Sæplast Americas Inc. is a world leader in the design and manufacture of rotational-moulded containers for use in all sectors of the food industry. Our full range of Sæplast PE containers and Sæplast PUR containers – as well as pallets – are your product's passport for a safe journey. Whatever the product, the Sæplast lines have the right container to give you peace of mind.

When it comes to reliably protecting your products for food safety, there is no safer name to trust than Sæplast.
