

DP40FVPallet

Sæplast introduces a new anti-skid pallet for in plant environments

Sæplast has developed another offering to their 48" x 40" footprint pallet line. The newly developed model DP40FV is ideal for any closed loop applications and its anti-skid design is sure to be highly beneficial.

The DP40FV works well in moist or wet working environments to minimize the loaded product from shifting and sliding off during loading or moving. Additionally, the DP40FV will allow customers to use a slip sheet under the load without concerns of the product getting dislodged or becoming askew.

The rotationally molded polyethylene DP40FV combines the requirement for a flat top, easy to clean, textured pallet and fulfills customers' needs for an anti-slip surface.

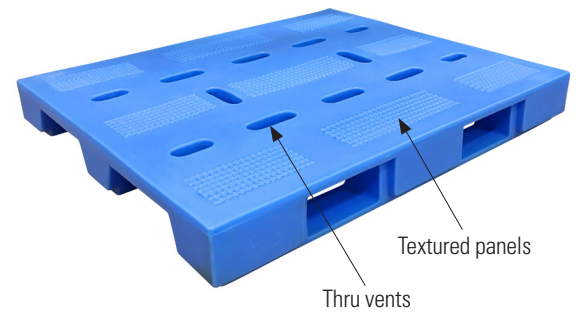

The Sæplast DP40FV joins the company's existing and highly successful Sæplast pallet line designed for the North American Market. All of the Sæplast DP40 pallet line offer 100% virgin food grade polyethylene that conform to all food contact regulation and complies fully for a total food safe option as compared to non-food friendly wooden pallets and brittle injection molded plastic pallets.

DP40FV pallet

Benefits & Attributes:

- Footprint: 48" x 40"
- Flat Top – no ridges present around perimeter of product
- Venting – Twelve (12) slot shaped vents on top of pallet
- Friction – Nine (9) textured panels are a slip resistant feature which increase friction & can help to prevent sliding of product on the pallet
- Radical breakthrough with ingeniously designed integrated water channels
- Repairable
- Flexible under stress

The Sæplast DP40FV is manufactured from durable polyethylene and like all Sæplast products it can be personalized in a custom color and specified with a variety of tracking options including barcodes, QR codes and RFID tags.

Dimensions in inches and lbs

Type	Description	Outside dimension			Weight
		L	W	H	Lbs
DP40FV	Pallet with texture panels and thru vents	48	40	6.5	48

Dimensions in cm and kg

Type	Description	Outside dimension			Weight
		L	W	H	Kg
DP40FV	Pallet with texture panels and thru vents	122	102	16.5	22

The material used fully complies with food industry regulations. Dimensions and weights are +/-2%
