

Containers and pallets

Pump up your catch values!

Your live catch is valuable, so it is important to eliminate excess stress

Quality starts at the point of harvest, as soon as the lobster is taken out of the water. To maximize the quality, we need to stabilize and reduce the stress as soon as possible with the utmost care. By reducing handling and stress, one can minimize damage to lobster, keeping them as healthy as possible for their journey to our plates. A healthy lobster has maximum value.

The Sæplast PUR containers, have a versatility second to none, and they are a key component to your success.

The Sæplast PUR on board handling containers offer a unique solution for the storage, handling and transportation of live lobster especially when used in conjunction with the 70 litre tote pans and the Lobster Crates.

Quality can be maintained – don't lose it!

DX310 		
Dimensions	External inches	Internal inches
Length	43	36
Width	22	19
Height	26	25
Height with lid	29	
Weight (lbs)	Box 60	Lid 15
Volume	Litres 260	US Gal. 69

DX332 		
Dimensions	External inches	Internal inches
Length	48	43
Width	43	38

Weight (lbs)	Box 188	Lid 69
Volume	Litres 1200	US Gal. 317

* holds 6 lobster crates & ice

Three levels of drains

The Saeplast D345 holds up to 6 Lobster Crates

Maximizing Catch Quality

Reducing Stress is a Key to Success

As your live catch is so valuable, it must be treated in such a way to eliminate any excess stress.

Stress = mortalities = loss of quality and loss of revenue.

By putting your lobster into crates or tote pans, and then into one of the Saeplast PUR containers, you can be assured the lobster will calm down as quickly and quietly as possible thus saving their energy for their journey to our plates!
