Model DP40R available - rib height is 0.5" | 1.27 cm in height

Stacking

Ergonomic design and streamlined construction ensure that Saeplast containers can be easily stacked to maximise use of valuable storage space.

Colours

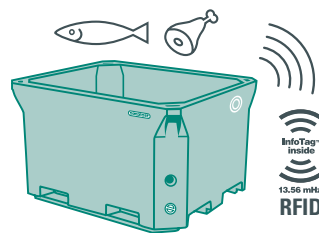

- Saeplast containers are available in various standard colours. Specific colours can be ordered for volume purchases.
- Colours are ideal for HACCP factory segregation.

Deep printed markings

- Deep printed markings (silk screen print) are available that enhance the appearance and make containers easily identifiable.
- These markings are of single colour in black, blue, green, red or white.
- Multicolour mould-in-graphics are also available upon request and at an added cost.

Tracking options

RFID

SÆPLAST offers a wide range of tubs, pallets and other products, which can be equipped with Radio Frequency Identification (RFID) tags. The RFID ensures that each tub is marked, tracked and easily managed. RFID is a powerful wireless solution that stores information and keeps track of your products.

BARCODE

We are also able to equip SÆPLAST tubs, pallets and buggies with customer barcodes. The barcode contains machine-readable data and is frequently used in warehouses for stock assessment.

QR-CODE

We are also able to equip SÆPLAST tubs, pallets and buggies with a QR code. QR code is a fast and safe optical reading of data. Scan the QR code for more information.
